Problem 2

1 point possible (graded)

In an HTML form, the difference between a radio button and a check box is that:

- The user may choose only one option from a group of radio buttons, but may choose many options from a group of check boxes.
- The user may choose only one option from a group of check boxes, but may choose many options from a group of radio buttons.
- When a check box is selected, all other check boxes are unselected, but this is not the case with radio buttons.
- The only difference is their appearance.
