Important HTML Tags: <html>

• After the declaration, HTML pages must start with the `<html>` tag

• Often referred to as the *root element* because it can be considered the root of the tree-like structure of elements in an HTML page

```
<!DOCTYPE html>
<html>
  (all other elements should go here)
</html>
```

[Start of transcript. Skip to the end.](#)

Last time we looked at how a web browser works.

How a web browser uses the HTTP protocol for a client to send an HTTP request for some content or data on the World Wide Web. And how the server uses HTTP to send back the response.

Now, often that response which includes the content or data that's requested uses HTML.
