Quiz 1.2

[Bookmark this page](#)

Problem 1

1/1 point (graded)

Hypertext Transfer Protocol (HTTP) is used to:

☐ Request information about a resource on the World Wide Web.

☐ Provide a unique identifier for a resource on the World Wide Web.

☐ Locate a resource on the World Wide Web.

☒ Transfer content on the World Wide Web ✔

Answer

Correct! The client initiates the transfer by sending an HTTP request to the server, which replies with an HTTP response.

✔ Correct (1/1 point)

Problem 2

1/1 point (graded)

The first line of an HTTP response always includes:

☒ The protocol version and status code ✔

☐ The HTTP action/verb and argument to the action/verb.

☐ The URL that was requested and the content at that address.

☐ Information about the server.

Answer

Correct! This tells the client/browser which version of HTTP the server is using and whether the request was successfully handled.
