Quiz 1.9

[Bookmark this page](#)

Problem 1

1/1 point (graded)

The primary goal of Responsive Web Design is to:

- Develop Web pages in such a way that they respond to the size of the device and browser when being rendered. ✓
- Develop Web pages in such a way that they respond to the actions of the user.
- Allow for the inclusion of libraries that modify the appearance of the Web content.
- Allow parts of Web pages to change while other parts stay the same.

Answer

Correct: RWD is an approach to designing Web pages in a way that takes all devices into account.

Problem 2

1/1 point (graded)

When organizing content using Bootstrap, we use:

- <div> elements in the “container” and “row” classes. ✓
- <div> elements in the “table” and “tr” classes.
- <table> and <tr> elements in the “container” classes.
- <row> and <col> elements in the “container” classes.

Answer

Correct:

The “container” <div> spans the width of the page and represents the area where the RWD content should reside. The “row” <div> represents the horizontal group of columns that hold the content.
