Video 1.1

PENPWJSX2017-V000500

The World Wide Web

- Web follows similar network structure as the Internet
- Web pages link to other web pages, thus forming a graph where:
 - Nodes represent an individual document/resource
 - Edges represent a link from one document/resource to another (directed edges)

0:00 / 6:01

Start of transcript. Skip to the end.

You're watching this video, probably using some sort of web browser.

In the browser, there's the video itself.

Maybe up at the top there's some images, off to the side is some text.

Maybe somewhere on the page you can click a link, click a button, and something else on the page will change, or you'll go to a different page.

How does all that work?

How does the content get from
