## Quiz 1.4

[Bookmark this page](#)

### Problem 1

1/1 point (graded)

In HTML, the `<p>` tag is used to:

- ☐ Mark the beginning of a new page.
- ☒ Mark the beginning of a new paragraph. ✓
- ☐ Include a single line break between two sentences.
- ☐ Render content in a larger font.

#### Answer

Correct: This should be used to represent the text that is a single thought or concept within the content.

✓ Correct (1/1 point)

### Problem 2

1/1 point (graded)

In HTML, the difference between a `<div>` and a `<span>` is that:

- ☒ A `<div>` should contain larger pieces of content that stand alone as a unit, whereas a `<span>` is a small piece of content. ✓
- ☐ A `<div>` will always be rendered in a larger font than a `<span>` .
- ☐ A `<div>` is part of the HTML page's `<head>` element whereas a `<span>` is part of the `<body>` .
- ☐ A `<div>` must have a `<p>` element as a child whereas a `<span>` cannot.

#### Answer

Correct:  
A `<div>` is generally used for holding major pieces of the page, e.g. a menu or navigation bar, whereas a `<span>` is generally just a few words or sentences.
