Quiz 1.3

[Bookmark this page](#)

Problem 1

1/1 point (graded)

The two child elements of the `<html>` element in an HTML page are:

☐ `<header>` and `<footer>`

☒ `<head>` and `<body>` ✓

☐ `<meta>` and `<content>`

☐ `<title>` and `<body>`

Answer

Correct!
The `<head>` element contains information about the page and references to external resources; the `<body>` element contains the content itself.

✓ Correct (1/1 point)

Problem 2

1/1 point (graded)

When transmitted using HTTP, HTML content is part of the:

☐ header of an HTTP request

☐ URI in an HTTP request

☐ header of an HTTP response

☒ body of an HTTP response ✓

Answer

Correct: This is how the server sends the HTML content back to the client/browser.
