Quiz 1.5

[Bookmark this page](#)

Problem 1

1/1 point (graded)

The HTML “style” attribute allows us to:

- ☐ Define a new HTML tag.
- ☐ Specify the location of the HTML element within the page.
- ☒ Specify the appearance of the HTML element.
- ☐ Indicate that an HTML element should only be rendered depending on the user’s actions.

Answer

Correct: This allows us to specify the font color, font size, background color, etc.

Correct (1/1 point)

Problem 2

1/1 point (graded)

The difference between an HTML “class” and “id” is that:

- ☐ An HTML element can belong to many classes but only have one id.
- ☒ Multiple HTML elements can belong to the same class but each id must be unique.
- ☐ Every HTML element belongs to at least one class but does not have to have an id.
- ☐ Nothing, they’re the same thing!

Answer

Correct: Classes are groups of elements, but only one element may have a given id.
